Claims:

I claim:

1. A method for communicating and ordering material and supply data from an intended recipient, comprising the steps of:

initiating said contractor/customer ordering computer program;

entering one or more material or product names and a specific quantity desired for each material or product into said categorization table;

said ordering program attaching an intended recipient specific part number and part name, stock keeping unit (SKU), universal product code or bar code for each material or product entered;

said ordering program generating a list displaying the intended recipient specific product number and product name, SKU number, universal product code, or bar code and quantity for each individual product;

2. The method as recited in claim 1 further comprising the means of transferring said list to said intended recipient.

3.   The method as recited in claim 1 wherein said ordering computer program is located remotely from the contractor's/customer's computer.

4.   The method as recited in claim 1 wherein said contractor/customer accesses the computer program over a internet or network system.

5. A method for communicating and ordering material and supply data from an intended recipient, comprising the steps of:

initiating said contractor/customer ordering computer program;

selecting a recipient from a first menu displayed by said computer program;

entering one or more material or product names and a specific quantity desired for each material or product into said categorization table;

said ordering program attaching an intended recipient specific part number and part name, stock keeping unit (SKU), universal product code or bar code for each material or product entered;

said ordering program generating a list displaying the intended recipient specific product number and product name, SKU number, universal product code, or bar code and quantity for each individual product; and

24

1   6.   The method as recited in claim 5 further comprising the means of

2   transferring said list to said intended recipient.

3

4   7.   The method as recited in claim 5 wherein said ordering computer program

5   is located remotely from the contractor's/customer's computer.

6

7   8.   The method as recited in claim 5 wherein said contractor/customer accesses

8   the computer program over a internet or network system.

9

10   9. A method for communicating and ordering material and supply data from an

11   intended recipient at a remote location, comprising the steps of:

12

13   initiating said contractor/customer ordering computer program;

14

15   said ordering program displays a construction phase specific categorization

16   table;

17

18   entering one or more material or product names and a specific quantity

19   desired for each material or product into said categorization table;

20

21   said ordering program attaching the recipient's specific part number and

22   part name, stock keeping unit (SKU), universal product code or bar code for

23   each material or product entered; and

24

said ordering program generates the recipient's specific product number and product name, SKU number, universal product code, or bar code and quantity for each individual product.

10. The method as recited in claim 9 wherein said ordering computer program is located remotely from the contractor's/customer's computer.

11. The method as recited in claim 9 wherein said contractor/customer accesses the computer program over a internet or network system.

12. A method for communicating material and supply data to an intended recipient at a remote location, comprising the steps of:

initiating said contractor/customer ordering computer program;

entering one or more material or product names and a specific quantity desired for each material or product into said categorization table;

said ordering program attaching said recipient's specific part number and part name, stock keeping unit (SKU), universal product code or bar code for each material or product entered; and

said ordering program generating a list of the recipient's specific product

1   number and product name, SKU number, universal product code, or bar

2   code and quantity for each individual product.

3

4   13.   The method as recited in claim 12 wherein said ordering computer program

5   is located remotely from the contractor's/customer's computer.

6

7   14.   The method as recited in claim 12 wherein said contractor/customer

8   accesses the computer program over a internet or network system.
